Asbestos Records Introduction

About the Asbestos Module

Creating an asbestos register for your estate within Ostara enables easy reference to this data. The asbestos register is displayed to all resources as part of the start work order permit process to give full visibility before work commences.

**Pre-Requisites for setting up Asbestos Records**

The following information needs to be existent in the system before Asbestos Records can be made:
> Buildings exist against the client
> Locations exist against the client

How to access

Click on the Building tab and, if your User profile grants you permission, you will see the following buttons for the Asbestos module:

Creating an Asbestos Record
Viewing/Editing an Asbestos Record
