## Select Work Order for Audit Introduction

🛗 Wed, Jan 17, 2024 🛛 🖿 Select Work Order for Audit

In cases where data checks are required to ensure the integrity of the what is being entered in the system, a Desktop Audit can be created. Once created, the User can select the Work Orders that will be apart of the Audit.

1. Clicking "Select Work Orders for Audit" will display Search Work Orders For Audit pop up screen. From here, the User needs to select the Audit Target (which can be Work Order Data, Certificates and Invoices). Then they can select a random number/percentage of Work Order/Invoices/Certificates along with the ability to refine the search to specific. Click "OK" to get a list of Work Orders.

Search Work Orders For A	Audit	
Audit Target	Select ×	
Select Random	10 Percent -	
Refine Search	Define	
	OK Cancel	

**Note:** This search will only be performed on Work Orders completed in the last month by default.

**Note:** When refining the search, the regular Work Order Query Definition screen appears. Unlike a normal Query Definition, this search already has criteria filled in on the Dates tab. The Completed Date field is filled in to ensure the search would normally occur within the last month. This can be removed to configure the search exactly how it is desired.

2. Once the data has been returned, open up the desired Work Orders. When opened, the User can go to the Agent Actions menu and go to Audit> Mark Work Order for Audit.

3. This opens the corresponding pop up. Tick the Audit this WO should associate to and enter any notes regarding this decision. In certain cases, there may already be an Audit the WO is associated to and if so, these will be shown in the Existing Audit column.

Mark Work Order for Audit						
Tick any audit targets you wish to apply to this work order						
	Туре	Applies?	Applies Now?	Existing Audit		
	Work Order Data	Yes	Yes			
						^
						¥
					OK	Cancel

Once selected, click "OK" to mark the WO for Audit.

**Note:** If a situation occurs where the WO needs to be removed from the Audit, perform the action Audit > Remove Work Order from Audit. This will display the Remove Work Order from Audit screen which works in the same way as the Mark Work Order for Audit screen except the User will need to untick the Audit this WO should be removed from.

Remove Work Order from Audit Un-tick any audit targets you wish to remove from this work order								
	Туре	Applies?	Applies Now?	Existing Audit				
	Work Order Data	Yes	Yes	Pending (marked by Ostara on 11/06/2018)
