## Document Types

💾 Wed, Jan 17, 2024 🛛 🖿 Core Data

Documents can be added against most areas of the system. When uploading a document the User is asked to specify a Type (and often Sub Type). Click "Document Types" to view/modify any Document Types available in the system. This is the "Document Types" button:

- Select Document Area Asbestos . Asset Building Compliance Contract Inventory Invoice Ξ Person Quote Resource Task Type Work Order Work Order - Asset Work Order - Asset (Audit) Work Order - Asset (PPM) Work Order - Asset (Purchasing) Work Order - Asset (Quote) Work Order - Asset (Reactive) Filter... OK Cancel
- 1. The first step is to select the area that the Document Types apply to:

2. This is the Document Types screen. It is possible to tick and un-tick the desired Document Types that should be available depending on which types you want available throughout the system. As with many other parts of the application, there is the ability to add items and edit items within the list using the "Add" and "Edit" buttons.

3. Click on "Add" to add a new Document Type or Sub Type:

4. If a Document Type is being added, the "Add Document Type" screen will appear. Provide the "Name" and "Description" of the new Type as well its "Date Type" (whether this Document Type should have a date range, an exact date or no dates associated to it), "Special Type" (whether this is an Image, Link, or part of a group of Document Types - such as Invoice & Worksheet) and the "Profiles" this Document Type is available to (clicking this field will display the Profiles screen in which the User ticks the relevant Profiles and clicks "OK"). Click on "OK" to commit the information.

Add Document Type		
Name		
Date Type	None	
Special Type	None *	
System Area	Building 🔹	
Profiles	Click here to make a selection	
	OK Cancel	
	Cancel	

5. If a Sub Type is being added, the Name and Description can be set, but the remainder of fields will be inherited from the Document Type.

Powred by PHPKB (Knowledge Base Software)

6. Items in the list can also be edited. The Edit screens work in the same way as the Add screens and require all the necessary information for the different items.

7. Once all the changes have been made, click "Save" to apply them.

**Note:** Access to these Document Types can be controlled by Profiles - so that specific Users only have access to particular Document Types.
