My Site Compliance

Thu, Jan 18, 2024 Portal Widgets

The Portal provides Users with the ability to view the compliance levels of their Buildings. This is shown in the "My Site Compliance" widget which provides the option to see how many certificates are against the Users site(s) and how many certificates have been uploaded. By clicking the number of certificates (highlighted in blue) all the latest certificates, against the Users site(s), are displayed.

Below is a typical list of certificates. Each certificate has a Certificate Name, an Asset Number (if applicable), a Status which will be either Current (if the certificate is currently valid) or Expired (if the expiry date has passed), an Expiry Date and a Building Name. Clicking a certificate allows Users to download the certificate which they can they save and view as they please.
