

# Home Tab

If there is any need to return to the Home page or to access specific lists that can only be found on the Home page then there is a quick and simple way to do it. By clicking the "Home" tab, the User will be taken back to their Home page (the page that appears as soon as they log in). This is available from every page on the Portal and is the available for every User. See the [Home Page](#) page for more information.
