Asbestos Tab

Fri, Jan 19, 2024 Portal Tabs

Some Buildings may have traces of Asbestos and will contain an Asbestos record which may need to be viewed by a Resource or a specific User. This can be achieved using the "Asbestos" tab. This tab will display all Asbestos records for Buildings the User has access to, once selected. Each record will show the location of the Asbestos, how much has been located and whether it the Asbestos has been removed or is still present.
