Core Data

Permission Name	Associated Category	Purpose	Dependencies
Can Add Documents	Core Data	Provides the ability to add Documents throughout the system	
Can Allocate Dynamic Execution To Profile	Core Data		
Can Associate Asbestos Risks	Core Data		
Can Associate Asbestos Status	Core Data	Ability to tick and untick Asbestos Statuses. Enables the Building button in Core Data tab	Can Associate Core Data
Can Associate Asbestos Types	Core Data	Ability to tick and untick Asbestos Types. Enables the Building button in Core Data tab	Can Associate Core Data
Can Associate Asset Conditions	Core Data	Ability to tick and untick Asset Conditions for the Management Company. Enables the Types & Formats button in Core Data tab	Can Associate Core Data
Can Associate Asset Risks	Core Data	Ability to enable/disable Asset Risks for use in the system	
Can Associate Attendance Paused Reasons	Core Data	Ability to enable/disable Attendance Paused Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Associate Audit Reasons	Core Data	Ability to tick and untick Audit Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Authorisation Reasons	Core Data	Ability to tick and untick Authorisation Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Building Types and Formats	Core Data	Ability to tick and untick Building types and formats for a client. Enables the Types & Formats button in Core Data tab	Can Associate Core Data
Can Associate Contact Types	Core Data	Allows User to tick and untick contact types against a client. Enables Contact Types button in Core Data tab	Can Associate Core Data
Can Associate Contract Cancellation Reasons	Core Data	Ability to enable/disable Contract Cancellation Reasons for use in the system	
Can Associate Contractor Zones	Core Data		
Can Associate Core Data	Core Data	Performs no action on its own, however it is a requirement to enable the 'Can Associate' permissions within Core Data	
Can Associate	Core Data	Ability to tick and untick Countries in Core Data. Enables the System button in Core	Can Associate Core Data

Countries	Core Data	Data. Enables the System button in Core Data tab	Can Associate Core Data
Can Associate Credit Note Reasons	Core Data		
Can Associate Currencies	Core Data	Ability to tick and untick Currencies in Core Data. Enables the Finance button in Core Data tab	Can Associate Core Data
Can Associate Custom Email Templates	Core Data		
Can Associate Document Types	Core Data	Ability to tick and untick Document Type in Core Data. Enables the Document Types button in Core Data tab	Can Associate Core Data
Can Associate Equipment/Service Types	Core Data	Allows User to tick and untick equipment and service types against a client. Enables the Equipment/Service Types button in Core Data	Can Associate Core Data
Can Associate Estates	Core Data		
Can Associate F-Gas Leak Detection Methods	Core Data	Ability to tick and untick F-Gas Leak Detection Methods in Core Data. Enables the Asset button in Core Data tab	Can Associate Core Data
Can Associate F-Gas Reasons	Core Data	Ability to tick and untick F-Gas Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate F-Gas Types	Core Data	Ability to tick and untick F-Gas Types in Core Data. Enables the Asset button in Core Data tab	Can Associate Core Data
Can Associate Fix Types	Core Data	Ability to tick and untick Fix Types in Core Data. Enables the Equipment & Services button in Core Data tab	Can Associate Core Data
Can Associate Invoice Unallocated Reasons	Core Data	Ability to tick and untick Invoice Unallocated Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Invoice Unapproved Reasons	Core Data	Ability to tick and untick Invoice Unapproved Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Locations	Core Data	Provides ability to tick and untick locations for a client. Enables Locations button in Core Data tab	Can Associate Core Data
Can Associate Notifications	Core Data	Allows User to tick and untick notifications against a client and enables the Notifications button in the Core Data tab	Can Associate Core Data
Can Associate Operational Zones	Core Data		
Can Associate Payment Terms	Core Data	Provides the ability to tick and untick payment terms for a client. Enables the Payment Terms button in Core Data tab	Can Associate Core Data
Can Associate	Core Data	Ability to tick and untick Planned Reasons in Core Data. Enables the Reasons button in	Can Associate Core Data

Planned Reasons	Core Data	Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Portal FAQs	Core Data	Ability to tick and untick Portal FAQs in Core Data. Enables the System button in Core Data tab	Can Associate Core Data
Can Associate Ppm Task Groups	Core Data		
Can Associate Profiles	Core Data	Ability to tick and untick profiles against a client. Enables Profiles button in Core Data tab	Can Associate Core Data
Can Associate Purchase Units	Core Data	Ability to tick and untick Purchase Units in Core Data. Enables the Part button in Core Data tab	Can Associate Core Data
Can Associate Purchasing Reasons	Core Data	Ability to tick and untick Purchasing Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Purchasing Return Reasons	Core Data	Ability to enable/disable Purchasing Return Reasons in the system	
Can Associate Purchasing Work Order Priorities	Core Data	Ability to enable/disable Work Order Priorities in the system (Purchasing)	
Can Associate Quote Reasons	Core Data	Ability to tick and untick Quote Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Reactive Reasons	Core Data	Ability to tick and untick Reactive Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Reactive Work Order Priorities	Core Data	Ability to enable/disable Work Order Priorities in the system (Reactive)	
Can Associate Regions	Core Data	Ability to tick and untick Portal FAQs in Core Data. Enables the System button in Core Data tab	Can Associate Core Data
Can Associate Resource Groupings	Core Data	Ability to tick and untick Resource Groupings in Core Data. Enables the Resource button in Core Data tab	Can Associate Core Data
Can Associate Review Departments	Core Data	Ability to tick and untick Review Departments in Core Data. Enables the Finance button in Core Data tab	Can Associate Core Data
Can Associate Standards and Legislation	Core Data	Provides User with the ability to tick and untick standards & legislations against a client. Enables the Standards & Legislation button in Core Data tab	Can Associate Core Data
Can Associate Symptoms	Core Data	Ability to enable/disable Reactive Work Order Symptoms in the system	
Can Associate System Reasons	Core Data	Ability to tick and untick System Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Tax		Ability to tick and untick Tax Codes in Core	

Can Associate Tax Codes	Core Data	Data. Enables the Finance button in Core Data tab	Can Associate Core Data
Can Associate Unit of Issue	Core Data	Ability to tick and untick Units of Issue in Core Data. Enables the Part button in Core Data tab	Can Associate Core Data
Can Associate Units Of Measurement	Core Data	Allows Users to tick and untick measurement units for a client and enables the Measurement Units button in Core Data tab	Can Associate Core Data
Can Associate Work Order Not Done Reasons	Core Data		
Can Associate Work Order Refusal Reasons	Core Data	Ability to tick and untick Work Order Refusal Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Associate Core Data
Can Associate Work Order Type Groups	Core Data		
Can Associate Work Order Types	Core Data	Ability to tick and untick work order types against a client. Enables Work Order Types button in Core Data tab	Can Associate Core Data
Can Associate Zero Accrual Reasons	Core Data		
Can Create Asbestos Risks	Core Data		
Can Create Asbestos Status	Core Data	Ability to add/create new Asbestos Statuses for the selected client. Enables the Contact Types button in Core Data tab	Can Create Core Data
Can Create Asbestos Types	Core Data	Ability to add/create new Asbestos Types for the selected client. Enables the Contact Types button in Core Data tab	Can Create Core Data
Can Create Asset Conditions	Core Data	Provides the ability to create new Asset Conditions. Enables the Asset Conditions button in Core Data tab	Can Create Core Data
Can Create Asset Risks	Core Data	Ability to create new Asset Risks for use in the system	
Can Create Attendance Paused Reasons	Core Data	Ability to add/create new Attendance Paused in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Audit Reasons	Core Data	Ability to add/create new Audit Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Authorisation Reasons	Core Data	Ability to add/create new Authorisation Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Building Types And Formats	Core Data	Allows User to create Building types and formats for a client. Enables the Types & Formats button in Core Data tab	Can Create Core Data
Can Create Clients	Core Data	Provides the ability to create new clients by copying previous existing clients. Enables the Copy Client button in the Core Data tab	Can Create Core Data

Can Create Contact Types	Core Data	Ability to add/create new contact types for the selected client. Enables the Contact Types button in Core Data tab	Can Create Core Data
Can Create Contract Cancellation Reasons	Core Data	Ability to create new Contract Cancellation Reasons for use in the system	
Can Create Contractor Zones	Core Data		
Can Create Core Data	Core Data	Performs no action on its own, however it is a requirement to enable the other 'Can Create' permissions within Core Data	
Can Create Countries	Core Data	Ability to add/create new Countries for the selected client. Enables the System button in Core Data tab	Can Create Core Data
Can Create Credit Note Reasons	Core Data		
Can Create Currencies	Core Data	Ability to add/create new Currencies for the selected client. Enables the Finance button in Core Data tab	Can Create Core Data
Can Create Custom Email Templates	Core Data		
Can Create Document Types	Core Data	Ability to add/create new Document Types for the selected client. Enables the Document Types button in Core Data tab	Can Create Core Data
Can Create Equipment/Service Types	Core Data	Provides User ability to create equipment/service types against a client. Enables the Equipment/Service Types button.	Can Create Core Data
Can Create Estates	Core Data		
Can Create F-Gas Leak Detection Methods	Core Data	Ability to add/create new F-Gas Leak Detection Methods for the selected client. Enables the Asset button in Core Data tab	Can Create Core Data
Can Create F-Gas Reasons	Core Data	Ability to add/create new F-Gas Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create F-Gas Types	Core Data	Ability to add/create new F-Gas Types for the selected client. Enables the Asset button in Core Data tab	Can Create Core Data
Can Create Fix Types	Core Data	Ability to add/create new Fix Types for the selected client. Enables the Equipment & Services button in Core Data tab	Can Create Core Data
Can Create Invoice Unallocated Reasons	Core Data	Ability to add/create new Unallocated Invoice Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Invoice Unapproved Reasons	Core Data	Ability to add/create new Unapproved Invoice Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
		Enables User to create Building levels, areas	

Can Create Locations	Core Data	and locations. Enables the Locations button in Core Data tab	Can Create Core Data
Can Create Notifications	Core Data	Allows User create and order Notifications against a client. Enables the Notifications button in the Core Data tab	Can Create Core Data
Can Create Operational Zones	Core Data		
Can Create Payment Terms	Core Data	Provides ability to add/create payment terms for a client and enables the Payment Terms button in Core Data tab	Can Create Core Data
Can Create Planned Reasons	Core Data	Ability to add/create new Planned Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Portal FAQs	Core Data	Allows User create and order Portal FAQs against a Client. Enables the System button in the Core Data tab	Can Create Core Data
Can Create Ppm Task Groups	Core Data		
Can Create Profiles	Core Data	User can add profiles to the system. The Profiles button is enabled in Core Data tab	Can Create Core Data
Can Create Purchase Units	Core Data	Ability to add/create new Purchase Units in Core Data. Enables the Part button in Core Data tab	Can Create Core Data
Can Create Purchasing Reasons	Core Data	Ability to add/create new Purchasing Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Purchasing Return Reasons	Core Data	Ability to create new Purchasing Return Reasons in the system	
Can Create Purchasing Work Order Priorities	Core Data	Ability to create new Work Order Priorities in the system (Purchasing)	
Can Create Quote Reasons	Core Data	Ability to add/create new Quote Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Reactive Reasons	Core Data	Ability to add/create new Reactive Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Reactive Work Order Priorities	Core Data	Ability to create new Work Order Priorities in the system (Purchasing)	
Can Create Regions	Core Data	Ability to add/create new Regions in Core Data. Enables the System button in Core Data tab	Can Create Core Data
Can Create Resource Groupings	Core Data	Ability to add/create new Resource Groupings in Core Data. Enables the Resource button in Core Data tab	Can Create Core Data
Can Create Review Departments	Core Data	Ability to add/create new Review Departments in Core Data. Enables the Finance button in Core Data tab	Can Create Core Data

		Finance button in Core Data tab	
Can Create Standards and Legislation	Core Data	Ability to add new standards and legislations against a client and enables the Standards/Legislations button in Core Data tab	Can Create Core Data
Can Create Symptoms	Core Data	Ability to create new Reactive Work Order Symptoms in the system	
Can Create Task Type Documents	Core Data	Provides the ability to add images to Equipment/Services Types. Enables the Image button on an Equipment/Service Type	Can Edit Core Data, Can Edit Equipment Types, Can Edit Service Types
Can Create Tax Codes	Core Data	Ability to add/create new Tax Codes in Core Data. Enables the Finance button in Core Data tab	Can Create Core Data
Can Create Unit of Issue	Core Data	Ability to add/create new Units of Issue in Core Data. Enables the Part button in Core Data tab	Can Create Core Data
Can Create Units Of Measurement	Core Data	Ability to add new measurement units against the selected client. Enables the Measurement Units button in Core Data tab	Can Create Core Data
Can Create Users	Core Data	User can create Users and client specific Users. Enables the Access tab when creating People in the Person Detail screen	Can Edit People, Can View People
Can Create Work Order Not Done Reasons	Core Data		
Can Create Work Order Refusal Reasons	Core Data	Ability to add/create new Work Order Refusal Reasons in Core Data. Enables the Reasons button in Core Data tab	Can Create Core Data
Can Create Work Order Type Groups	Core Data		
Can Create Work Order Types	Core Data	Provides ability to create new Work Order types against a client and enables the Work Order Types button in Core Data	Can Create Core Data
Can Create Zero Accrual Reasons	Core Data		
Can Delete Documents	Core Data	Provides the ability to delete Documents throughout the system	
Can Delete Task Type Documents	Core Data	Provides the ability to delete images from Equipment/Services Types. Enables the Image button on an Equipment/Service Type	Can Edit Core Data, Can Edit Equipment Types, Can Edit Service Types
Can Edit Asbestos Risks	Core Data		
Can Edit Asbestos Status	Core Data	Ability to edit Asbestos Statuses for the selected client. Enables the Contact Types button in Core Data tab	
Can Edit Asbestos Types	Core Data	Ability to edit new Asbestos Types for the selected client. Enables the Contact Types button in Core Data tab	
Can Edit Asset	Core Data	Gives the user the ability to edit Asset Conditions. Enables the Asset Conditions	Can Edit Core Data

	Core Data	Conditions. Enables the Asset Conditions button in Core Data tab	Can Edit Core Data
Conditions			
Can Edit Asset Custom Data Specification	Core Data	Gives the user the ability to edit Asset Custom Data. Enables the Custom Data Specification button in Core Data	Can Edit Core Data
Can Edit Asset Risks	Core Data	Ability to edit Asset Risks within the system	
Can Edit Attendance Paused Reasons	Core Data	Ability to edit Attendance Paused Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit Audit Reasons	Core Data	Allows User to edit all Audit Reasons against the selected client. Enables the Reasons drop down menu in Core Data	Can Edit Core Data, Can Create Core Data
Can Edit Authorisation Reasons	Core Data	Ability to edit Authorisation Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit Building Custom Data Specification	Core Data	Gives the user the ability to edit Building Custom Data. Enables the Custom Data Specification button in Core Data	Can Edit Core Data
Can Edit Building Groupings	Core Data	Allows User to edit Building Groupings against the selected client. Enables the Groupings drop down menu in Core Data	Can Edit Core Data, Can Create Core Data
Can Edit Building Types and Formats	Core Data	Ability to edit Building types and formats against a client. Enables Types & Formats button in Core Data tab	Can Edit Core Data
Can Edit Client Configuration	Core Data	Provides User the ability to configure client information. Enables the Client Configuration button	Can Edit Core Data
Can Edit Contact Types	Core Data	User can edit contact types against the selected client and enables the Contact Types button	Can Edit Core Data
Can Edit Contract Cancellation Reasons	Core Data	Ability to edit Contract Cancellation Reasons for use in the system	
Can Edit Contractor Zones	Core Data		
Can Edit Core Data	Core Data	Performs no action on its own, however it is a requirement to enable the other 'Can Edit' permissions within Core Data	
Can Edit Countries	Core Data	Ability to edit Countries for the selected client. Enables the System button in Core Data tab	
Can Edit Credit Note Reasons	Core Data		
Can Edit Currencies	Core Data	Ability to edit Currencies for the selected client. Enables the Finance button in Core Data tab	
Can Edit Custom Email Templates	Core Data		
Can Edit Document	Core Data	Ability to edit Document Types for the selected client. Enables the Document Types	

Types	Core Data	selected client. Enables the Document Types button in Core Data tab	
Can Edit Equipment Types	Core Data	Ability to change both equipment and service types for the chosen client	Can Edit Core Data, Can View Equipment/Service Types
Can Edit Equipment/Service Keywords	Core Data	Provides ability to change the keywords against the selected equipment/service type	Can Edit Core Data, Can View Equipment/Service Types
Can Edit Estates	Core Data		
Can Edit F-Gas Leak Detection Methods	Core Data	Ability to edit F-Gas Leak Detection Methods for the selected client. Enables the Asset button in Core Data tab	
Can Edit F-Gas Reasons	Core Data	Ability to edit F-Gas Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit F-Gas Types	Core Data	Ability to edit F-Gas Types for the selected client. Enables the Asset button in Core Data tab	
Can Edit Fix Types	Core Data	Ability to edit fix types by client and enables the Fix Types button in Core Data tab	Can Edit Core Data, Can Create Core Data
Can Edit Inventory Types	Core Data		
Can Edit Invoice Unallocated Reasons	Core Data	Ability to edit Unallocated Invoice Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit Invoice Unapproved Reasons	Core Data	Ability to edit Unapproved Invoice Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit Level/Area/Location Cost Codes	Core Data	Ability to amend the date ranges behind the Location Cost Codes	Can Edit Core Data, Can Edit Locations
Can Edit Location Mapping Custom Data Specification	Core Data	Ability to edit the User Defined field names against the Custom Data for Location Mappings	
Can Edit Locations	Core Data	Provides the ability to edit levels, areas and locations against the specified client and enables the Locations drop down menu in the Core Data tab	Can Edit Core Data
Can Edit Notifications	Core Data	Provides the ability to edit notifications against the specified client and enables the Notifications button in the Core Data tab	Can Edit Core Data
Can Edit Operational Zones	Core Data		
Can Edit Part Types	Core Data	Ability to edit part types by client and enables the Part Types button in Core Data tab	Can Edit Core Data, Can Create Core Data
Can Edit Payment Terms	Core Data	Provides User the ability to edit the Management Company payment terms. Enables the Payment Terms button in Core Data	Can Edit Core Data
Can Edit Permissions	Core Data	Allows User to edit Permissions at their associated level. Enables the Permissions button in Core Data	Can Edit Core Data

		button in Core Data	
Can Edit Person Custom Data Specification	Core Data	Ability to edit the User Defined field names against the Custom Data for People	
Can Edit Placeholders	Core Data		
Can Edit Planned Reasons	Core Data	Allows User to edit all Planned Reasons against the selected client. Enables the Reasons drop down menu in Core Data	Can Edit Core Data, Can Create Core Data
Can Edit Portal FAQs	Core Data	Allows User edit Portal FAQs against a Client. Enables the System button in the Core Data tab	
Can Edit Ppm Task Groups	Core Data		
Can Edit Profiles	Core Data	Ability to configure profiles within the system and show the Users associated to the profiles. Enables the Profiles button as well as the Equipment/Service types button in Core Data	Can Edit Core Data
Can Edit Public Holidays	Core Data	Ability to edit the Public Holidays listed in Core Data in the system	
Can Edit Purchase Units	Core Data	Ability to edit Purchase Units in Core Data. Enables the Part button in Core Data tab	
Can Edit Purchasing Reasons	Core Data	Ability to edit Purchasing Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit Purchasing Return Reasons	Core Data	Ability to edit Purchasing Return Reasons in the system	
Can Edit Purchasing Work Order Priorities	Core Data	Ability to edit Work Order Priorities in the system (Purchasing)	
Can Edit Quote Reasons	Core Data	Allows User to edit all Quote Reasons against the selected client. Enables the Reasons drop down menu in Core Data	Can Edit Core Data, Can Create Core Data
Can Edit Reactive Reasons	Core Data	Allows User to edit all Reactive Reasons against the selected client. Enables the Reasons drop down menu in Core Data	Can Edit Core Data, Can Create Core Data
Can Edit Reactive Work Order Priorities	Core Data	Ability to edit Work Order Priorities in the system (Purchasing)	
Can Edit Regions	Core Data	Ability to edit Regions in Core Data. Enables the System button in Core Data tab	
Can Edit Resource Custom Data Specification	Core Data	Gives the user the ability to edit Resource Custom Data. Enables the Custom Data Specification button in Core Data	Can Edit Core Data
Can Edit Resource Groupings	Core Data	Ability to edit Resource Groupings in Core Data. Enables the Resource button in Core	

Groupings		Data tab	
Can Edit Review Departments	Core Data	Ability to edit Review Departments in Core Data. Enables the Finance button in Core Data tab	
Can Edit Service Types	Core Data	Provides User ability to edit service types against a client. Enables the Equipment/Service Types button.	
Can Edit Symptoms	Core Data	Ability to edit Reactive Work Order Symptoms in the system	
Can Edit System Configuration	Core Data		
Can Edit System Reasons	Core Data		
Can Edit Task Type Cost Codes	Core Data	Ability to edit the cost code and sub cost code for an equipment/service type.	Can Edit Core Data, Can View Equipment/Service Types, Can Edit Equipment Types OR Can Edit Service Types
Can Edit Task Type Documents	Core Data	Provides the ability to edit images from Equipment/Services Types. Enables the Image button on an Equipment/Service Type	Can Edit Core Data, Can Edit Equipment Types, Can Edit Service Types
Can Edit Task Type Name	Core Data	Ability to edit the task name for an equipment/service type.	Can Edit Core Data, Can View Equipment/Service Types, Can Edit Equipment Types OR Can Edit Service Types
Can Edit Tax Codes	Core Data	Ability to edit Tax Codes in Core Data. Enables the Finance button in Core Data tab	
Can Edit Toolbar Buttons	Core Data	Ability to edit the Toolbar Button names in the system	
Can Edit Unit of Issue	Core Data	Ability to edit Units of Issue in Core Data. Enables the Part button in Core Data tab	
Can Edit Units Of Measurement	Core Data	Provides User the ability to edit any units of measurement in the system against a client. Enables the Measurement Units button in Core Data	Can Edit Core Data, Can Edit Units Of Measurement
Can Edit Users	Core Data	Allows User to edit and reset the passwords for any Users and client Users. Enables the Access tab when viewing/editing People in the Person Detail screen.	Can Edit People, Can View People
Can Edit Work Order Custom Data Specification	Core Data	Gives the user the ability to edit Work Order Custom Data. Enables the Custom Data Specification button in Core Data	Can Edit Core Data
Can Edit Work Order Not Done Reasons	Core Data		
Can Edit Work Order Refusal Reasons	Core Data	Ability to edit Work Order Refusal Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can Edit Work Order Type Code	Core Data		

Can Edit Work Order Type Cost Codes	Core Data	Ability to amend the date ranges behind the Work Order, Sub Work Order and Equipment/Service Type Cost Codes	Can Edit Core Data, Can Edit Work Order Types, Can View Work Order Types
Can Edit Work Order Type Description	Core Data	Ability to edit the Name of a Work Order Type in the system	
Can Edit Work Order Type Groups	Core Data		
Can Edit Work Order Types	Core Data	Provides ability to edit work order types for the selected client. Enables the Work Order Types button in Core Data	Can Edit Core Data, Can View Work Order Types
Can Edit Zero Accrual Reasons	Core Data		
Can Perform Core Data Localisation Bulk	Core Data		
Can Send Custom Emails To Work Order Contact	Core Data	Ability to configure Workflow Emails to be sent to the Contact of a Work Order	
Can View Asbestos Risks	Core Data		
Can View Asbestos Status	Core Data	Ability to view Asbestos Statuses for the selected client. Enables the Contact Types button in Core Data tab	
Can View Asbestos Types	Core Data	Ability to view new Asbestos Types for the selected client. Enables the Contact Types button in Core Data tab	
Can View Asset Conditions	Core Data	User has the ability to view the Asset Conditions in the system. Enables the Asset Conditions button in Core Data tab	Can View Core Data
Can View Asset Risks	Core Data	Ability to view Asset Risks within the Core Data area of the system	
Can View Attendance Paused Reasons	Core Data	Ability to view Attendance Paused Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View Audit Reasons	Core Data	Allows User to view Audit Reasons against the selected client. Enables the Reasons drop down menu in Core Data	
Can View Authorisation Reasons	Core Data	Ability to view Authorisation Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View Building Types And Formats	Core Data	Provides ability to view Building types and formats against a client. Enables the Types & Formats button in Core Data tab	Can View Core Data
Can View Contact Types	Core Data	Ability to view the contact types against a client. Enables Contact Types button in Core Data tab	Can View Core Data
Can View Contract Cancellation Reasons	Core Data	Ability to view Contract Cancellation Reasons for use in the system	

Reasons			
Can View Contractor Zones	Core Data		
Can View Core Data	Core Data	Performs no action on its own, however it is a requirement to enable the other 'Can View' permissions within Core Data	
Can View Countries	Core Data	Ability to view Countries for the selected client. Enables the System button in Core Data tab	
Can View Credit Note Reasons	Core Data		
Can View Currencies	Core Data	Ability to view Currencies for the selected client. Enables the Finance button in Core Data tab	
Can View Custom Email Templates	Core Data		
Can View Document Types	Core Data	Ability to view Document Types for the selected client. Enables the Document Types button in Core Data tab	
Can View Equipment/Service Types	Core Data	Ability to view the equipment/service types against a client. Enables Equipment/Service Types button in Core Data tab	Can View Core Data
Can View Estates	Core Data		
Can View F-Gas Leak Detection Methods	Core Data	Ability to view F-Gas Leak Detection Methods for the selected client. Enables the Asset button in Core Data tab	
Can View F-Gas Reasons	Core Data	Ability to view F-Gas Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View F-Gas Types	Core Data	Ability to view F-Gas Types for the selected client. Enables the Asset button in Core Data tab	
Can View Fix Types	Core Data	Ability to view fix types by client and enables the Fix Types button in Core Data tab	
Can View History	Core Data	Ability to view the History button against Core Data Items to see the last date/time and user who amended the Core Data Item	
Can View Invoice Unallocated Reasons	Core Data	Ability to view Unallocated Invoice Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View Invoice Unapproved Reasons	Core Data	Ability to view Unapproved Invoice Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View Locations	Core Data	Ability to view the levels, areas & locations against a client. Locations drop down menu in Core Data tab	Can View Core Data
Can View Notifications	Core Data	Ability to view notifications setup against a client. Notifications button in Core Data tab	Can View Core Data
Can View Operational Zones	Core Data		

Can View Payment Terms	Core Data	Provides ability to view payment terms against a client. Enables Payment terms button in Core Data tab	Can View Core Data
Can View Permissions	Core Data	Provides ability to view permissions at your Administration level and lower. Enables Permissions button in Core Data tab	Can View Core Data
Can View Placeholders	Core Data		
Can View Planned Reasons	Core Data	Allows User to view Planned Reasons against the selected client. Enables the Reasons drop down menu in Core Data	
Can View Portal FAQs	Core Data	Allows User view Portal FAQs against a Client. Enables the System button in the Core Data tab	
Can View Ppm Task Groups	Core Data		
Can View Private Project Codes	Core Data	Ability to see and therefore select Project Codes marked as "Private"	
Can View Profiles	Core Data	Allows User to view profiles at their Administration Level and lower. Enables Profiles button in Core Data tab	Can View Core Data
Can View Public Holidays	Core Data	Ability to view the Public Holidays listed in Core Data in the system	
Can View Purchase Units	Core Data	Ability to view Purchase Units in Core Data. Enables the Part button in Core Data tab	
Can View Purchasing Reasons	Core Data	Ability to view Purchasing Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View Purchasing Return Reasons	Core Data	Ability to view Purchasing Return Reasons in the system	
Can View Purchasing Work Order Priorities	Core Data	Ability to view Work Order Priorities in the system (Purchasing)	
Can View Quote Reasons	Core Data	Allows User to view Quote Reasons against the selected client. Enables the Reasons drop down menu in Core Data	
Can View Reactive Reasons	Core Data	Allows User to view Reactive Reasons against the selected client. Enables the Reasons drop down menu in Core Data	
Can View Reactive Work Order Priorities	Core Data	Ability to view Work Order Priorities in the system (Purchasing)	
Can View Regions	Core Data	Ability to view Regions in Core Data. Enables the System button in Core Data tab	
Can View Resource Groupings	Core Data	Ability to view Resource Groupings in Core Data. Enables the Resource button in Core Data tab	

Can View Review Departments	Core Data	Ability to view Review Departments in Core Data. Enables the Finance button in Core Data tab	
Can View Symptoms	Core Data	Ability to view Reactive Work Order Symptoms in the system	
Can View Task Type Documents	Core Data	Provides the ability to view images from Equipment/Services Types. Enables the Image button on an Equipment/Service Type	
Can View Tax Codes	Core Data	Ability to view Tax Codes in Core Data. Enables the Finance button in Core Data tab	
Can View Toolbar Buttons	Core Data	Ability to view the Toolbar Button names in the system	
Can View Unit of Issue	Core Data	Ability to view Units of Issue in Core Data. Enables the Part button in Core Data tab	
Can View Units Of Measurement	Core Data	Ability to view units of measurement setup against a client. Measurement Units button in Core Data tab	Can View Core Data
Can View Work Order Not Done Reasons	Core Data		
Can View Work Order Refusal Reasons	Core Data	Ability to view Work Order Refusal Reasons in Core Data. Enables the Reasons button in Core Data tab	
Can View Work Order Type Groups	Core Data		
Can View Work Order Types	Core Data	Ability to view the work order types against a client. Enables Work Order Types button in Core Data tab	Can View Core Data
Can View Zero Accrual Reasons	Core Data
