

# Confirm Specification/Send Quote Requests

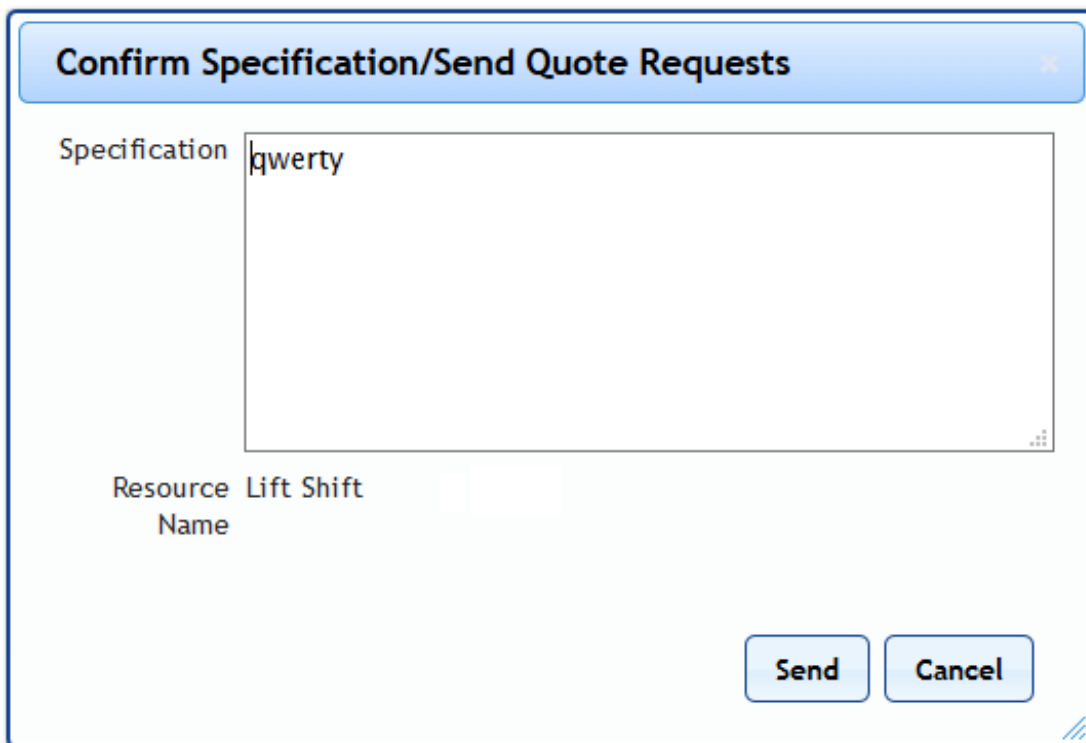

Fri, Jan 19, 2024 Job Detail Actions

In some cases, the user creating the Quote may not have the permissions to send the Quote Requests out to the Resources as this may be handled by others. For these users there is the "Confirm Specification/Send Quote Requests" action.

1. On the Job Detail screen, select the "Confirm Specification/Send Quote Requests" button to display the Confirm Specification/Send Quote Requests pop-up.

2. The pop-up displays the Specification field along with the specification entered by the previous user (if there is one) and the Resources the requests will go to. The User can adjust the specification as needed and once everything is correct, clicking the OK button will send out the Quote Requests.

A screenshot of a pop-up window titled "Confirm Specification/Send Quote Requests". The window has a blue header bar with the title and a close button. Below the header, there is a text input field labeled "Specification" containing the text "qwerty". Below the input field, there is a list of resources, with the first one being "Lift Shift" and "Name" below it. At the bottom right of the window, there are two buttons: "Send" and "Cancel".
