"Resource Groupings" are used to restrict what financial information a User can view for the Resources under those specific groupings. These are a good means of restricting Users to only allow them to view specific details of Resources. The Resource Groupings screen allows Users to create, edit or delete these Resource Groupings. To view "Resource Groupings", click the "Resource Groupings" button.

1. This is the Resource Groupings screen. Here, the desired Resource Groupings can be ticked and un-ticked depending on which types need to be available throughout the system. As with many other parts of the application, it's possible to add items and edit items within the list using the "Add" and "Edit" buttons.
