

Logging Off/Exiting Ostara

📅 Wed, Jan 17, 2024 📁 [Accessing the Application](#)

If Users no longer need to use the system then there are two ways to exit/close down the application. These, located in the System tab, are as follows:

1. Clicking the "Log off" button will display a confirmation message asking if the User is sure they want to log off. If "Yes" is selected, the User is logged out and the main log in window is shown. If "No" is selected, the User is returned to the main application window.
2. Clicking the "Exit" button will close down the application completely.
